

Ben-Malik Tchamalam

Software Developer

Born in 1998 in Benin, I am in my last year of Computer Engineering with more than 5 years of programming experience seeking for an opportunity that would allow me to put in practice the knowledge I have acquired both at school and my previous roles and unleash my potential in the field. I have not been employed recently as I have been busy working on my final year project.

Izmir, Turkey

Courses

- Algorithm Analysis and Design
- Machine Learning
- Design Patterns
- Data Structures

SKILLS

React Native Flutter C/C++ C# PHP

Java Python HTML5 CSS AngularJS

JavaScript Micro services MySQL Postgresql

XML Agile Team Player Embedded Systems

New technologies enthusiast Self and Quick Learner

Organised Git Trello Jira Slack

Excellent Communication skills

Problem Solving & Debugging skills

PERSONAL PROJECTS

EventTag (02/2020 – Present)

- Designed the UX of a mobile app to allow people to be aware of all sorts of events taking or to take place in the near future on a location basis.
- Implemented the mobile App using React Native including features such as liking, commenting, sharing, searching, and displaying events as a list and on a live Google/Apple Maps.

Job Recruitment System (11/2018 – 03/2019)

- Created a job recruitment system when companies will be able to post vacancies, and candidates in turn could view and apply to them based on their skills alongside with one of my Professors, Assoc. Prof. Dr. Tugkan Tuglular.

Website Manager Desktop Application (02/2019 – 06/2019)

- Implemented a desktop app using JavaFx allowing people with no programming skills to edit their WordPress website in just a button click.
